

Cambridge International Examinations

Cambridge International Advanced Subsidiary and Advanced Level

COMPUTING	9691/12
CENTRE NUMBER	CANDIDATE NUMBER
CANDIDATE NAME	

Candidates answer on the Question Paper.

No additional materials are required.

No calculators allowed.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use an HB pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer **all** questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

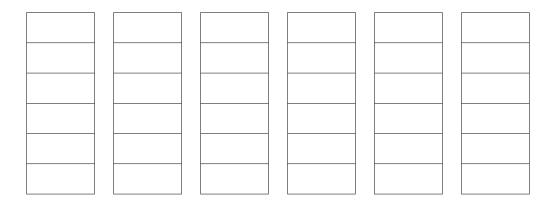

1 hour 30 minutes

1 /	(a)	A stack	is	initially	emntv
	(a)	A SIACK	ıo	II IIIIIaii y	CHIPLY.

The following sequence of operations is then performed:

Push value "Green"
Push value "Red"
Pop value
Pop value
Push value "Blue"
Push value "Orange"

Show the contents of the stack after each operation.

(b)	A queue	is	initially	empty.
-----	---------	----	-----------	--------

The following sequence of operations is then performed:

Insert value "Green"
Insert value "Red"
Remove value
Remove value
Insert value "Blue"
Insert value "Orange"

Show the contents of the queue after each operation.

2	(a)	Define the terms buffer and interrupt.
		Buffer
		Interrupt
		[2]
	(b)	Describe how buffers and interrupts are used when sending data from a computer to a printer
		LV.

3 Six computer terms and six descriptions are shown below.

Draw a line to link each term to its description.

Description Computer term Removal of unnecessary data in Array a file by encoding it using fewer bits Software that has the ability to Transaction processing draw conclusions based on rules applied to stored knowledge System where responses to Data compression input must be quick enough to influence the source of data Set of elements referenced by a single identifier; each element Expert system referenced by one or more subscripts Volatile storage which can be Broadband written to or read from

Data transmission method where many channels are used at the same time; achieved by using a range of frequencies

[5]

Random access memory

4 A random access file is used to store customer records. The key field, CustomerID, is in the range 1000 to 9999.

A hashing algorithm has been designed to calculate each record's address using:

x MOD 100 returns a value which is the remainder when x is divided by 100.

The record with this key is then stored at the calculated address.

(a) Records with the following key fields are to be added to the file:

Write the CustomerID where these records would be stored:

Address	Record
00	
01	
02	
03	
04	
05	
06	
07	
08	
))
96	
97	
98	
99	

(b) (i)	An additional record with key field 5097 is to be stored.
	State what will happen to the existing contents of the file.
	[1
(ii)	Describe how the file handling software could prevent the outcome stated in part (b)(i).
	[2]

			δ
5	A n		r power station consists of four reactors. Each reactor is monitored from a separate contro
			nitoring system was first installed in 1995. The existing software and hardware have no ntly changed since then.
	(a)	The	entire monitoring system is to be replaced.
		Give	e three reasons why the management of the power station has decided to do this.
		1	
		2	
		3	
	(b)		ew system has been developed. The management must choose a method of changing to the new system when it is installed.
		(i)	Name and describe a suitable method of changeover.
			Name
			Description
			[2
		(ii)	Name and describe a method of changeover that would not be appropriate.

Description

(c) When the monitoring system is operational, it needs to be maintained.

Describe each type of maintenance shown. Give an example which requires each type of maintenance for this system.
Corrective
Example
Adaptive
Example
Perfective
Example
[6]

6	The following	list	shows	five	storage	media:
---	---------------	------	-------	------	---------	--------

- CD-ROM
- DVD-RAM
- internal hard disk
- external hard disk
- flash memory
- (a) The table below shows five applications.

For each application, choose the most appropriate storage medium from the list.

Application	Storage medium
A programming text book provided with sample code in electronic form	
Storage of photographs in a digital camera	
A backup of the complete PC file system; to be kept off-line	
Storage of operating system and applications software	
Simultaneous recording and playback of video files with removable optical media	

		[5]
(b) (i)	Name the storage medium which is an example of a solid state memory.	
		[1]
(ii)	Give two benefits of using solid state memories.	
	1	
	2	
		[2]

7	(a)	(i)	Choose between:	
			laser printer / inkjet printer (circle your choice)	
			Describe one feature and one drawback of your chosen type of printer.	
			Feature	
			Drawback	
		/::\	Change between	[2
		(ii)	Choose between:	
			3D printer / graph plotter (circle your choice)	
			Describe one feature and one drawback of your chosen device.	
			Feature	
			Drawback	
				[2

(b) Name each input device described below:

It reads parallel dark and light lines which represent a string of characters.

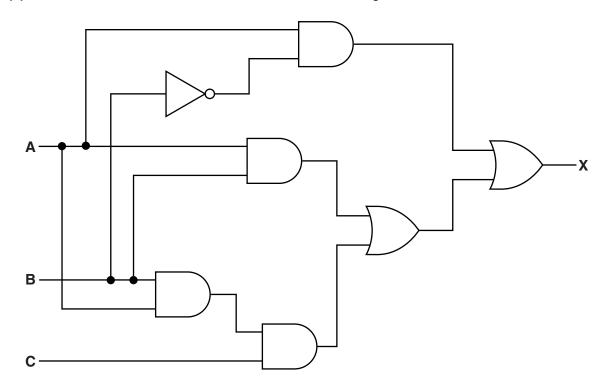

Used for entry of numbers and arithmetic symbols only.

Users select options by simply making finger contact with its surface.

[4]

It has buttons to make selections and a small wheel to allow scrolling.

8 (a) A student, in an electronics lesson, built the following circuit.

(i) Complete the truth table for this logic circuit.

	Inputs		Working space	Output
Α	В	С		X
0	0	0		
0	0	1		
0	1	0		
0	1	1		
1	0	0		
1	0	1		
1	1	0		
1	1	1		

- 1		
	4	

(ii)	Study the output in your answer to part (a)(i).
	State what could replace this whole logic circuit.

	[4

(b) Write a logic expression to represent the following logic circuit.

J A COILEGE AGVELLISES ILS COULS	9	A college	advertises	its	course	S
----------------------------------	---	-----------	------------	-----	--------	---

(a)	Rather than advertise in a local newspaper, the college decides to produce a computer-based
	presentation. This presentation is to be shown in a local shopping mall.

Describe three advantages in doing this rather than using the local newspaper.	
1	
2	
3	
	[3]

(b) The college runs up to 30 different courses. Students can enrol online for courses.

A form has been designed to allow input of the following:

- name
- payment card number (16 digits)
- email address
- course code
- start month of course (June or November)
- agreement to college terms and conditions

/	C	CIE College			`
Name:					
Payment card:					
Email:		@ [
Cour	se code:		∇		
June		November		\bigcirc	
☐ Agre	e to the terms	s and condition	ıs		
В	ack			Submit	

Study the form design.

State and justify each widget (GUI control) used. One has been done for you.

Input	Widget (GUI control)	Justification
name	text box	names can be variable lengths
payment card number		
email address		
course code
